

Yara Khairat

Full-Stack Engineer | Next.js • NestJS • TypeScript | Production Systems

Egypt | +201027967876 | yarakhairat10@gmail.com | github.com/undefinedyara | in/yarakhairat

SUMMARY

Full-stack Software Engineer with 2 years of experience shipping production-grade web applications using **Next.js and NestJS**. Proven track record of building scalable dashboards, **optimizing API performance by 80%**, and leading framework migrations that **improved performance and SEO by 50%**. Product-minded engineer who thrives in fast-moving teams and owns features end-to-end.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend & Data: Node.js, NestJS, REST APIs, SQL, MySQL, MongoDB, Prisma, Firebase (Auth & Firestore)

Testing & Tools: Jest, Git, GitHub, CI/CD (GitHub Actions), Docker, Vercel

EXPERIENCE

Software Engineer | Devency

August 2025 – November 2025

- **Designed and implemented complex, maintainable front-end components and animations**, applying Clean Architecture principles to ensure testable and scalable code across web interfaces.
- **Integrated robust Firebase Authentication and state management**, resolving race conditions and ensuring seamless user login flows, showcasing the ability to manage critical user-facing systems.
- **Researched and applied design patterns and workflow improvements**, optimizing PR planning and team efficiency, demonstrating technical ownership and process impact.

Full-Stack Developer | Cryptic Web3

January 2024 – August 2025

- **Owned the development of a production KPI dashboard** in Next.js, visualizing on-chain, social, and engagement metrics for **17k+** blockchain tokens, enabling data-driven insights and boosting user engagement.
- **Integrated multiple backend services and APIs** (CoinGecko, X/Twitter, Telegram, YouTube, Matomo, Stripe) to support analytics and subscription management, ensuring reliable, real-time data across the platform.
- **Reduced Twitter (X) API latency by ~80%** through batching, significantly improving dashboard load times and user experience.
- **Led migration from JS Pages Router to TS App Router** in Next.js, resulting in a **50% improvement in Core Web Vitals (LCP/FID)** and significantly boosting SEO rankings

Frontend Developer | Self-Employed

June 2023 – Present

- **Designed** and delivered customizable storefronts supporting hundreds of products, implementing responsive layouts, theming, and localization.
 - **Managed** end-to-end project workflow from requirements gathering to deployment, ensuring client satisfaction and maintainable code.
-

PROJECTS

Trill | Guitar Chord Library and Lookup Dashboard | **Live demo**

May 2025 – Present

- **Developed and maintain an interactive web dashboard** with a virtual fretboard and chord visualization system using Next.js, Firebase, and Tailwind CSS, enabling guitarists to learn and identify chords efficiently.
- **Built an interval-based chord identification engine** that maps user input to accurate chord names, supporting inversions and extended chords, demonstrating algorithmic and music-theory problem-solving.
- **Designed a scalable and maintainable system**, balancing frontend performance with backend data consistency for real-time interactions.

PictureThis | Graphical Password System using Image Segmentation.

June 2023 – December 2023

- **Developed a prototype graphical password system** using image segmentation, simplifying credential management and demonstrating innovation in security-focused UI/UX design.
-

EDUCATION

Bachelor of Computer Science | Culture and Science City, 6th of October, Giza, 2022
