SUMMARY

Web-centric Software Engineer with 2 years of hands-on experience building and shipping production web applications using **React and Next.js**, with strong backend integration via **NestJS and REST APIs**. Proven at delivering data-driven dashboards, performance optimizations, and end-to-end web features.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend & Data: Node.js, NestJS, REST APIs, SQL, MySQL, MongoDB, Prisma, Firebase (Auth & Firestore)

Testing & Tools: Jest, Git, GitHub, CI/CD (GitHub Actions)

EXPERIENCE

Software Engineer | Devency

August 2025 – November 2025

- **Developed** responsive, maintainable UI components and animations using **Flutter**, applying **Clean Architecture** principles to ensure **testable** and **scalable** code.
- **Integrated** Firebase Authentication with robust state management, resolving race conditions in complex authentication-focused animations to ensure a seamless user login experience.
- **Researched** and implemented design patterns and workflow improvements, **enhancing PR planning**, team collaboration, and overall development efficiency.

Junior Full-Stack Developer | Cryptic Web3

January 2024 – August 2025

- **Built** a production KPI dashboard in **Next.js**, visualizing on-chain, social, and engagement metrics across **17k+ blockchain tokens**, improving user insights and engagement.
- **Implemented** frontend data fetching and state management while integrating multiple backend services and APIs: **CoinGecko**, **X (Twitter)**, **Telegram**, **YouTube**, **Matomo**, and **Stripe** for analytics and subscription management.
- **Optimized** Twitter (X) data retrieval by **~80%** through **batching API requests** and improving backend aggregation logic.
- **Led** the migration from **JavaScript Pages Router** to **TypeScript App Router in Next.js**, improving performance, SEO, and user engagement by **50%**.

Frontend Developer | Self-Employed

June 2023 – Present

- **Designed** and delivered customizable e-commerce storefronts for clients, implementing responsive layouts, theming, and localization across devices.
 - **Managed** end-to-end project workflow from requirements gathering to deployment, ensuring client satisfaction and maintainable code.
-

PROJECTS

Trill | Guitar Chord Library and Lookup Dashboard | [Live demo](#)

May 2025 – Present

- **Developed and maintain** an interactive web dashboard with a **virtual fretboard and chord visualization system** using **Next.js**, **Firebase**, and **Tailwind CSS**.
- **Built an interval-based chord identification engine** that maps user input to **accurate chord names**, supporting inversions and extended chords.
- **Designed the system to be scalable and maintainable**, balancing frontend performance with backend data consistency.
- **Leveraged** Firebase for state management and real-time syncing, integrating backend logic with complex UI interactions.

PictureThis | Graphical Password System using Image Segmentation.

June 2023 – December 2023

- **Developed a prototype security system** that simplifies credential management using image segmentation.
-

EDUCATION

Bachelor of Computer Science | Culture and Science City, 6th of October, Giza, 2022
